

Patented roller. Through different peripheral speeds, this roller is capable to align the advancement of the tiles inside the kiln, before the material reaches the firing zone.

Mineralogical composition

- Corundum
- Mullite
- Zirconium

| | |
|--|--------------------------------------|
| Al ₂ O ₃ content | 78% |
| Bulk density | 2.85 Kg/dm ³ |
| Apparent porosity | 16% |
| Water absorption | 5.8% |
| M.O.E. 20 °C | > 105 GPa |
| Thermal expansion | 5.1*10 ⁻⁶ K ⁻¹ |

Identification color

Grey window
RAL 7040
